

AUTOMATYBHP

OHS VENDING MACHINE

SHORT DESCRIPTION

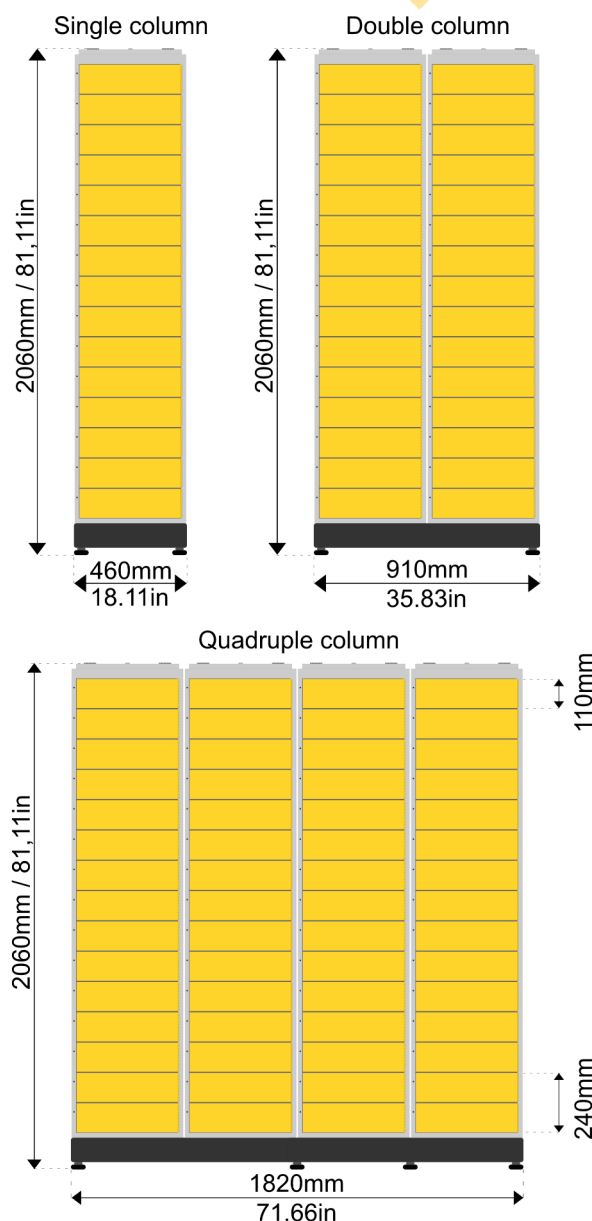

It is a compilation of the PPE vending machine and a tools cupboard with the management system. We add an automatic tools cupboard to our best and most sustainable solution, Kazik 13, thus enlarging its capacity and capabilities. This solves the problems of PPE distribution and tool flow management near the workplace.

BENEFITS

- Secure and availability of articles
- 24 hours a day, 7 days a week
- Reduced consumption
- CONTROLLED acquiring of single or packaged articles
- Availability of articles near the workplace
- Ability to set limits
- Employee supervision
- and many others...

APPLICATION

Vending machine designed for demanding users with non-standard needs. It combines the advantages of our two systems, KAZIK and Mietek. It consists of a KAZIK automatic or manual machine and a column cabinet controlled from a computer located in the KAZIK. This solution significantly expands the range of dispensed and stored products while reducing the cost of the device itself. The range of items handled is very wide from helmets and safety boots to power tools, test and measurement equipment, tool kits and other valuable equipment. Kazik can be expanded by one, two or four columns, depending on the needs of our client. It is possible to create special column cabinets (of any size) to individual customer order.

Network connection	Ethernet connection, Wi-Fi, mobile internet (work possibility without internet connection)
Supply voltage	230 V
Power consumption	Standby - max. 37W; at max. load does not exceed 64W
